We hold, however, that the Board's determination was not supported by substantial evidence in the record as a whole. 24 The Board suggests that because the union presented only one issue to the ALJ for decision, it was reasonable for the Board not to address the issue of the scope of the union's representation. However, when the union and employer agree to submit an issue to the ALJ for decision, it is their prerogative to choose which specific issues are to be decided. The Board had the responsibility to make its own determination whether the parties had agreed to a collective bargaining agreement, and we cannot sustain the Board's decision on this basis. See, e.g., Wagner Electric Corp. v. Local 1104, 586 F.2d 449, 451 (8th Cir.1978) (although the union presented the issue of whether it had standing to represent laid off employees to the Board, it was "the function of the Board" to decide the issue, and we are "without power to substitute our judgment for that of the Board"). 25 The Board also argues that it is reasonable for it to have relied on the ALJ's decision, because it is "incumbent on the parties to come to the administrative process fully prepared to present their own case." However, the ALJ had already decided the issue of whether the parties had a collective bargaining agreement. The Board was fully capable of reviewing this decision and independently determining whether the parties agreed to a collective bargaining agreement. The fact that it had previously agreed with the union that there was no collective bargaining agreement does not justify the Board's decision not to rule on the scope of the union's representation. 26 In support of its contention that it was reasonable
