CDX ESafeFile Download

CDX ESafeFile is a very simple to use and easy to install application that will help you secure your files. CDX ESafeFile will not replace your current secure email, File, or safe file encryption applications but will allow you to add new password protected email addresses and contacts to your personal or business address book. CDX ESafeFile is also a very easy to use program and does not require that the recipient use the internet or special software for the encrypted email to work. CDX ESafeFile will also do the encryption on the local machine. All you have to do is download the ESafeFile file, launch the program, enter your individual user password and the program will protect your files, folders or other data for you. If you want to encrypt certain files or folders for you it is quite easy to do with the drop down menu under Data select the files, folders or data that you want to add to the program and then click on the Protect tab or press the function F1 key and the program will add the data to your main password protected and encrypted self-extracting file. Install CDX ESafeFile Double click on the ESafeFile file to run the installation program. This will launch the Setup program, the CDX Installation Wizard. 1) The software will install the included WebSpace Web Service and CDX Controller Panel Web Front End. 2) Once all files and folders are installed the software will automatically start the program. CDX ESafeFile Features · Encrypt files, folders, etc... · Send encrypted self-extracting files · Encrypt email messages · Send encrypted email messages · Encrypt email addresses and contacts · Save info about contacts in its memory and add to contact databases · 100% Save your files and folders · Simple to use, easy to install · Built in password protected self-extracting files · Save file infos in its memory · Backup of file infos · Allow you to add file infos in encrypted form · Receive email notifications when passwords are changed or old · Allow you to send password protected email messages and encrypted files · Send encrypted email messages · Encrypt email addresses and contacts · PGP - PGP encryption technology · Encryption algorithm AES 256 · PGP certificate/Public key authentication · Encrypt files and folders · Encrypt email messages · Encrypt email addresses and contacts · Send encrypted email messages ·

What's New in the CDX ESafeFile?

- No special software required
- No online remote control
- Strong enough to secure any file
- Inert and virtually indestructible - It could take millions of years to break this encryption
- Password required to open the files
- AES, Blowfish and Twofish algorithms available
- Asymmetric (public/private) key encryption
- Very light weight
- Manual and automatic file encryption
- Password protection
- Self-extracting mode
- Email functionality
- A complete file protection solution
- Runs as a standalone application or in the Win8/Win7/WinVista 32/64-bit Minimal edition

All our applications are available in the following formats: AAC 2.0, M4A, MP3 and WAV 2.1. One year licensing, 15% discount on volume, personal or multi-user licenses. Key Features: · Blustream Audio encryption technology. · AES, Blowfish and Twofish encryption algorithms. · Separate encryption database that allows multiple user access. · Can create read only password protected self-extracting programs. · Works in Win8/Win7/WinVista 32/64-bit Minimal edition. · Requires no special knowledge of computers and is extremely simple to use. · Free to use and buy forever. · For personal use: for sharing, browsing, transferring data between PCs, fixing broken programs and anything else you can think of. · For business use: for sending encrypted files, sharing sensitive files and create private websites and web portals. ·

Legal: Free to use and buy forever. · No special hardware or Internet connectivity required. · Exclusive AES 128 or 256, compatible with Windows 8, 7, Vista 32/64-bit, Office, Mac, Android and BlackBerry. · Password required to open the files. · Hardened self-extracting mode (ESafeSafe). · Self-destruction mode that destroys itself after successfully opening the file. · Automatic, Manual and interactive anti-tampering protection. · In some cases, if the first 8 bytes of the file are 0x42 0x4d 0x00 0x00 0x00 0x00 0x01 0x02 0x03, The program will display the message "Your file is identified as a self-extracting file and encrypted using Blustream Audio encryption". ·
