There are few reports on the relationship between the expression of transforming growth factor-beta (TGF-beta) and ovarian neoplasms. In the present study, TGF-beta receptor 1 (R1) was immunohistochemically assessed in ovarian tumors as well as the relationship of R1 expression to clinical and pathological parameters. TGF-beta R1 was detected in the cytoplasm and membrane in epithelial ovarian cancer, mucinous cystadenoma, endometrioid cystadenoma and endometriosis, and in the cell membrane in serous cystadenoma, borderline tumors, and granulosa cell tumor. As for its relationship to prognosis, all cases with tumor grading score 4 showed positive staining for TGF-beta R1. However, there was no correlation between TGF-beta R1 expression and other clinicopathological parameters.OOPS! I made the
