Awesomenauts is a unique action-strategy game with a heavy focus on teamwork and tactical combat that you can pick up and play anywhere! Play locally or online with your friends in the same room or around the world, on all three console platforms (PC, Mac, and Linux). Oh, and we're working on an iOS version too! Awesomenauts features a unique hero creation system that lets you build your droids exactly how you want them to play. Weapons and abilities can be added and upgraded right at the character creation screen. With the many available and upgradeable skills in Awesomenauts, you can create dozens of different characters that can be played together in a variety of modes! Create a variety of unique and unpredictable teams that are capable of beating any other team! Key Features: Free-to-play, online multiplayer across platforms (Linux, Mac, Windows, iOS). Seamless cross-platform multiplayer via network or local client. Teamwork is vital! The game creates a dynamic team where players can choose to play together or work together as free agents. Collective effort allows you to destroy entire teams! Delegate your skills to other players while retaining control of your main character. Powerful game modes with complex rules that include unlockable Elite ranks, Challenges, and the ability to design custom matches, tournaments, and events. Fun and an expanding meta-game for a non-stop experience! When played alone, the game is deep, and when played with other players it is competitive and fun, but also always a fair fight. All the characters in the game look and play different, with their own personalities, skills, strengths, and weaknesses. Each player has a unique and visually distinct avatar with custom graphics! One of a kind physics-based movement and combat system that is supported by the most advanced graphics engine! Play anywhere! Internet enabled games are available on Linux, Mac and Windows. Offline gameplay is available on PC, Mac, and Linux. Only the game is under constant improvement! Key Screenshots: For more information about Aw

Fighter sounds explosion(fire,smash,explode) Player control a fighter shoot down all the enemies fighter and all the enemy to win the game Features- -Free FPS-Style Action Game -Multistage Campaign -High Quality Graphics -Addictive Gameplay -Playable in Single Player and Multiplayer -Gunship Missions -Embed your own music in the game -Unlimited amount of airstrikes-O'clock boost -Point System(Kill enemy soldier earn points)Trying to buy some time while investigating a lead? This is a real-time, interactive tool that allows you to move forward or backward in time to see how a lead develops. For example, we have one lead that doesn't look right at the very beginning, so we can instantly see how this all developed with just a simple mouse click. You can then "replay" the past actions to see how you can improve your results. When you first start working with Google Docs, you may feel that it can't do anything more than what's already possible in Microsoft Excel. However, after spending some time learning this tool you'll quickly discover just how useful it can be for your business. Not only can you create spreadsheets and workbooks, but you can also use it for simple presentations, invitations, form letters, and more. It's easy to work with and edit, making it a very versatile tool. Consider asking your customers for referrals. It could save you money down the line. "A big mistake a lot of business owners make is not taking advantage of all referral marketing opportunities. This can include asking your customers for referrals to other businesses," says Flynn. "You might be surprised with how many people are willing to share their patronage with others." All you need is a computer or smartphone, so if you're in the market for a new gadget today, think about going digital. With apps like Invoice2go, you can easily create, send, save and access business invoices online, saving the paper and ink. And you can download and create native apps for your smartphone, tablet and other devices. If you're a regular business owner looking for ways to improve your bottom line, then using a simple Excel tool is a great idea. With built-in functions, you can automate tedious tasks, track each transaction, follow up on overdue payments, and more. When

**Q: ASP.NET Calculation With Bezier Curves I am looking to get an algorithm for drawing bezier curves in ASP.NET. What I need is to get a series of x points, that act like coordinates for points in a bezier curve. The algorithm I am looking to write, need to be able to handle mathematically correct curves, while running efficiently. Getting points and curves based on points is the easy part. For example, I would like to be able to move the following point to the point {x:0,y:0} How can I tell that this bezier curve has an x of {x:0,y:0} and zeros for y? A: Here you go (in C#):**

```
public static bool CalculateBezier(float startX, float startY, int startSegments, float[][] controlPoints, List segPoints) { int count = 0; int maximumSegments = startSegments; float leftX = 0; float leftY = 0; float rightX = 0; float rightY = 0; float totalLength = 0; int minControlPoints = Math.Ceiling(maximumSegments / 2); for (int i = 1; i <
